

Thyme - Ingredient Development

DRAFT: FOR TECHNICAL DISCUSSION ONLY / NOT COMMERCIALY RELEASED

Proposed ingredient

Culinary thyme / locally sourced herb varieties

Botanical identity

NOT YET CONFIRMED. Common thyme and broadleaf thyme differ.

Origin target

Jamaica; origin verification and crop identification required

Proposed formats

Dried leaves; cut-and-sifted herb; other formats under trial

B2B applications

Seasonings, prepared foods, culinary manufacturing

MOQ and availability

Not established; pre-launch buyer discovery only

Moisture / water activity

Buyer-specific criteria and validated limits required

Microbiology / foreign matter

Requirements to be confirmed and tested

Shelf life / packaging

Subject to validation and qualified food-contact materials

Traceability / QA

Supplier qualification, lot coding and testing pending

Critical qualification requirement

Confirm the actual Jamaican herb species, leaf grade and buyer terminology before quoting.
Representative stock photography cannot establish local botanical identity.

This is NOT a Certificate of Analysis, verified product specification, permit, or indication of available stock.
No products are offered for immediate commercial sale. Rev 2 - October 2026.
